INVENTORY MANAGEMENT SOLUTION FOR AGRICULTURAL MACHINERY DEALER

Case Study: Industrial – Agricultural Machinery Dealer

A dealer of tractor, harvester and agricultural implements with headquarters in Brazil, required the support of RGIS. The dealership has a network of 20 stores distributed in states across the Midwest and North of Brazil. The company is dedicated to being a reference in excellent business in the agricultural machinery trade, quality technical assistance and spare parts to meet the needs of the field and the producer.

REQUIREMENT

The agricultural machinery dealer required an **inventory management solution for parts and accessories**, so required RGIS to provide the following:

- **Identify** missing barcodes
- Ensure all items were **barcoded**
- Full count of all **parts and accessories**
- Provide a **variance report** against current stock file

SOLUTION

The agricultural machinery dealer partnered with RGIS to complete the **agricultural equipment inventory management project**, and RGIS provided the following:

- Scheduled a team of **two experienced RGIS auditors** for three days to **create and attach missing barcodes**
- Scheduled an additional team of **14 experienced RGIS auditors** to complete a **full stock count of all parts and accessories**
- **Checked** barcode and location of stock items
- **Printed** missing barcodes and attached where required
- Created **variance reports**

RESULTS

The agricultural machinery dealer found that by outsourcing the **agricultural equipment inventory management project** to RGIS, the following results were achieved:

- A total of **50,000 items were accurately counted**
- **1,260 items were barcoded**
- **31.6% loss of stock identified**
- **Identified** that current in-house procedures had not been followed

By partnering with RGIS, the agricultural machinery dealer found out that **established in-house procedures were not being followed and that 31.6% loss of stock was identified**, which they were then able to rectify
