

# DISTRIBUTION CENTRE MONTHLY CYCLE COUNTS

**Case Study:** Industrial Stocktake – Industrial Equipment Supplier

An industrial equipment supplier required **cycle counts within the distribution centre**

# DISTRIBUTION CENTRE MONTHLY CYCLE COUNTS

## Case Study: Industrial Stocktake – Industrial Equipment Supplier

An industrial equipment supplier that specialises in industrial automation, weighing, electrical equipment, service station equipment, industrial filtration, pumping, instrumentation and mineral transportation required the support of RGIS. The company has more than 70 years of experience in the world of measurement, weighing, control, automation and power.

### REQUIREMENT

The industrial equipment supplier needed **cycle counts within the distribution centre**, so required RGIS to provide the following:

- **Monthly cyclical counts**
- A **complete stock count** of the distribution centre
- **Experienced auditors** able to complete both types of counts
- **Variance reports** to be created

### SOLUTION

The industrial equipment supplier partnered with RGIS to complete the **industrial equipment monthly cycle count project**, and provided the following:

- Scheduled two teams of **experienced RGIS auditors**
- A team of three RGIS auditors for 14 hours, to complete a **monthly cycle count**
- A team of 15 RGIS auditors for three days to complete a **full stock count**

### RESULTS

The industrial equipment supplier found that by outsourcing the **industrial equipment monthly cycle count project** to RGIS to complete, the following was achieved:

- **26,000 units of stock** accurately counted on monthly cycle counts
- **185,000 units of stock** in main stock count was accurately counted
- **Variance report identified missing stock**
- Did not need to use internal staff to complete the stock counts

By partnering with RGIS, the industrial equipment supplier found **missing stock was identified from regular monthly cycle counts with a variance report**
