

AGROCHEMICALS HEALTH AND SAFETY, STOCK CONTROL AND SECURITY INSPECTION

Case Study: Industrial – Chemical Products Producer

A chemical products producer needed a solution to **complete a stock audit inspection of the agrochemicals** held by third parties

AGROCHEMICALS HEALTH AND SAFETY, STOCK CONTROL AND SECURITY INSPECTION

Case Study: Industrial – Chemical Products Producer

The largest chemical producer in the world, based in Germany, required the support of RGIS. The chemical products producer comprises of subsidiaries and joint ventures in more than 80 countries and operates six integrated production sites with 390 other production sites in Europe, Asia, Australia, the Americas and Africa. The company has eleven divisions that are grouped into six segments: Chemicals, Materials, Industrial Solutions, Surface Technologies, Nutrition and Care and Agricultural Solutions.

REQUIREMENT

The chemical products producer wanted to have a **full audit inspection of the agrochemicals** held by third parties, so required RGIS to provide the following:

- **Work closely** with agriculture engineers
- **Identify** quantities, variances and quality
- Procedures to include **health and safety, stock control and security inspection**
- **Check expiry dates**

SOLUTION

The chemical products producer partnered with RGIS to complete the **agrochemicals health and safety, stock control and security inspection**, and provided the following:

- Scheduled a **team of 10 experienced RGIS auditors**
- Allocated **400 hours to complete all the inspections**
- RGIS project manager **developed an executive brief** containing all the inspection audit information

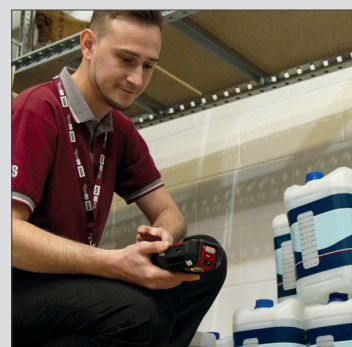

RESULTS

The chemical products producer found by outsourcing the **agrochemicals health and safety, stock control and security inspection** to RGIS, the following results were achieved:

- Based on the results of the audit inspection, a **batch and expiration system was recommended** to the customer
- **New procedures were implemented to improve processes**, for example all third parties must now inform the chemical products producer regarding the proximity of the expiration of products

By partnering with RGIS, the chemical products producer had a **new batch and expiration system implemented** with third parties, which will **reduce wastage of chemical products**
