LUXURY FASHION BRAND STORE INVENTORIES

Case Study: Retail Inventory – Luxury Fashion Retailer

One of the leading international fashion design houses and a symbol of Italian luxury world-wide required the support of RGIS. It designs, manufactures, distributes and retails fashion and lifestyle products including accessories, jewellery, watches, eyewear, fragrances, and home furnishings. The luxury fashion retailer distributes its products through a world-wide network which includes over 200 boutiques in the principal cities and over 1500 wholesalers worldwide.

REQUIREMENT

The luxury fashion retailer needed a solution to **provide experienced retail stocktakers** due to the cost of the high-end stock involved.

The retailer required RGIS to provide the following:

- RGIS auditors with **retail experience**
- Three **high-end stores** to be counted
- **Exceed accuracy** of previous internal counts
- **No disruption** to business, staff or customers

SOLUTION

The luxury fashion retailer partnered with RGIS to complete the **high-end stock store inventory counts**, and provided the following:

- Scheduled a team of **16 experienced RGIS auditors**
- Counted all stock with **care, speed and accuracy**
- Ensured same **reporting procedure** was used as other branches worldwide

RESULTS

The luxury fashion retailer found by outsourcing the **high-end stock store inventory counts** to RGIS, the following results were achieved:

- The retailer was impressed with the **accuracy and professionalism** of the RGIS auditors
- **Accuracy levels** exceeded previous internal counts
- **Ensured no disruption** was incurred by staff or customers

By partnering with RGIS, the luxury fashion retailer found that the **speed, accuracy and professionalism** of the RGIS auditors ensured **accuracy levels** exceeded previous internal counts
