

SIMULTANEOUS ACQUISITION INVENTORIES OF PESTICIDES

Case Study: Industrial – Investment Management Company

An investment management company needed **experienced stocktakers** that could **simultaneously count multiple locations** for an acquisition

SIMULTANEOUS ACQUISITION INVENTORIES OF PESTICIDES

Case Study: Industrial – Investment Management Company

One of the largest alternative investment management companies that focuses on Latin American assets required the support of RGIS. The investment management company invests in several segments in Brazil: agribusiness, pharma, food sector, among others and sought RGIS as a partner to carry out its acquisition inventories in several sectors.

REQUIREMENT

The investment management company needed **experienced stocktakers that could simultaneously count multiple locations** for an acquisition.

The investment management company required RGIS to provide the following:

- **Simultaneous inventories** at 10 different locations
- **Pesticides and agricultural supplies** to be counted
- **Count, verify and report** on 100% of the items
- Evidence to be provided of any **expired or damaged products**

SOLUTION

The investment management company partnered with RGIS to complete the **simultaneous acquisition inventories of multiple locations**, and provided the following:

- **Photographs** were taken of any expired or damaged products
- All inventory count **data was consolidated**
- Completed a **sample audit** of third-party products
- Scheduled a team of **60 experienced RGIS auditors**
- No barcodes, so counts were completed by product codes

RESULTS

The investment management company found by outsourcing the **simultaneous acquisition inventories of multiple locations** to RGIS, the following results were achieved:

- Stock counted at all 10 locations with a **financial value of over £11,300,000**
- **100% of the items were accurately counted** and audited to survey expired and/or damaged products
- **Stock variance value of £647,000** found
- **Identified all expired products** which represented **over £79,000**
- Presented all **financial and analytical reports** which finalised the acquisition process

By partnering with RGIS, the investment management company was able to identify a **stock variance of £647,000** and **expired products worth over £79,000**
