

THIRD PARTY INVENTORY ACCURACY CHECK

Case Study: Retail Services – DIY Store Chain

A DIY store chain needed an **environmentally friendly solution** to **check the accuracy of a third party stock count**

THIRD PARTY INVENTORY ACCURACY CHECK

Case Study: Retail Services – DIY Store Chain

A German DIY store chain offering home improvement and do-it-yourself goods required the support of RGIS. The DIY chain has 144 stores across Germany, Austria, Netherlands, Luxembourg, Switzerland, Czech Republic, Sweden, Slovakia and Romania; offering home improvement products such as home appliances, tools, household hardware, garden supplies and plants.

REQUIREMENT

The DIY store chain needed an **environmentally friendly solution** to **check the accuracy of a third party stock count**, so required RGIS to provide the following:

- **Accuracy** to be a priority
- Counts to be **completed overnight** so not to disrupt staff, customers or business
- **Check variances** from third party inventory completed

SOLUTION

The DIY store chain partnered with RGIS to complete the **inventory accuracy check project**, and provided the following:

- Scheduled teams of **experienced RGIS auditors** for each store
- **Checked all variances** against third party inventory count
- Counted all items in stores with **pen and paper**
- All counts were **completed overnight**, out of hours

RESULTS

The DIY store chain found by outsourcing the **inventory accuracy check project** to RGIS, the following results were achieved:

- Reporting was received in the format requested
- **Variances were identified** from the previous third party inventory count
- **Accuracy achieved** to the customers satisfaction
- Overnight counts meant there was **no disruption to the customer's business**

By partnering with RGIS, the DIY store chain found that **overnight counts** meant there was **no disruption to the business** and **variances were identified** from the previous third party inventory count
