

CAR PARTS SUPPLIER STAFF SUPPORT AND STOCK RELOCATION

Case Study: Industrial – Car Parts Supplier

A car parts supplier needed a solution to **empty stores of stock and transport to other locations** after buying a company and closing sites

CAR PARTS SUPPLIER STAFF SUPPORT AND STOCK RELOCATION

Case Study: Industrial – Car Parts Supplier

The UK's number one supplier of car parts with over 250 branches nationwide and 130,000 parts available, required the support of RGIS. Specialising in all the major car parts such as brake pads, wiper blades, batteries, bulbs and all essential car maintenance items including engine oil and car fluids. Also providing a range of interior accessories such as sat navs, stereos and speakers. Everything available both in store and online.

REQUIREMENT

The car parts supplier needed a solution to **empty stores of stock and transport to other locations** after buying a company and closing sites, so required RGIS to provide the following:

- Provide **national coverage** to cover all 52 sites
- Complete within given time frame
- **Remove all stock** from sites
- **Prepare stock for transportation** to new locations

SOLUTION

The car parts supplier partnered with RGIS to complete the **stock relocation and staff support project**, and provided the following:

- A **dedicated RGIS project manager** was assigned to oversee the project from start to completion
- A **schedule for all stores** was compiled, with **six experienced RGIS auditors** per site
- Each site to be **completed over a three week period**, Monday to Friday
- **Emptied all stock from shelves** and placed into trolleys
- Used picking sheets provided by the customer to **ensure the correct stock was being selected**
- Placed picked stock by correct loading bay, and then **loaded onto a truck** to be transferred to local sites or main distribution centre
- Continued this process until sites were completely empty

RESULTS

The car parts supplier found by outsourcing the **stock relocation and staff support project** to RGIS, the following results were achieved:

- All stock had **successfully been removed** from each location and transported to the new locations
- Had the relevant **RGIS staff support to complete each site on time**
- The customer was able to **utilise the stock** in other locations

By partnering with RGIS, the car parts supplier found the sites were **completely emptied of stock and successfully moved to the correct locations**

CUSTOMER TESTIMONIAL

"...as a direct result of RGIS, we have managed to stay on track and look to complete the project by end of the year and we look forward to the next challenge with RGIS."
