

3PL MEDICAL EQUIPMENT STOCK COUNT ACROSS MULTIPLE WAREHOUSES

Case Study: Logistics Centres – Logistics Group

A logistics group required RGIS to complete a **3PL warehouse count** of medical supplies in multiple locations **due to an increase in stock orders**

3PL MEDICAL EQUIPMENT STOCK COUNT ACROSS MULTIPLE WAREHOUSES

Case Study: Logistics Centres – Logistics Group

A multinational logistics, supply chain, manufacturing and consultancy company headquartered in England, required the support of RGIS. It has operations in Europe, North America, Australia and Japan and works across a variety of sectors that include automotive, retail, technology and rail.

REQUIREMENT

The logistics group has a National Health Service (NHS) contract, and due to Covid-19, the UK government ordered in huge amounts of medical supplies into the UK to help deal with the pandemic. The company needed support to help **validate and update stock records**, so required RGIS to provide the following:

- Complete a stock count of **14 different 3PL warehouse locations**
- Support the project for **four months**
- **Identify the location** of all products
- Provide an **accurate report** of exactly what NHS stock they had in each location
- All counts to be **validated by the 3PL warehouse**

SOLUTION

The logistics group partnered with RGIS to complete the **multiple 3PL warehouse stock count project**, and RGIS provided the following:

- After initial meetings with the customer, RGIS scheduled a team of **12 experienced RGIS auditors** working in three shift patterns per day, in teams of four
- Teams worked between **5 and 6 days a week** over the four-month period, in order to complete the count on time
- Pallets were lowered by 3PL teams to be counted
- Any issues or variances were fed directly back to the customer and the 3PL warehouse in a **daily report**, so that any **discrepancies could be investigated**

RESULTS

The logistics group found by outsourcing the **multiple 3PL warehouse stock count project** to RGIS, the following results were achieved:

- Accurately counted **over 200,000 SKUs and pallets** across 14 locations
- **A bespoke program** was created, so that it can be replicated to use in further counts for the logistics group
- Completed the count in the **four-month period**, as requested by the customer
- The customer was able to **reset the stock figures** and knew exactly where all the stock was situated across the 14 locations
- The customer was **extremely satisfied** with the services provided by RGIS
- RGIS continue to do **regular checks** on the 3PL warehouses to ensure good practices are being followed

By partnering with RGIS, the logistics group was able to **accurately update stock figures** across all 14 3PL warehouses and are now able to **locate the stock easily**
